EDUCATION

Indiana University

Master of Science in Data Science (Computational and Analytical Track)

Bloomington, IN

Aug. 2021 – Present

National Institute of Technology

Bachelor of Science in Computer Science

Patna, India

Aug. 2011 – Jun. 2015

WORK EXPERIENCE

Senior Software Dev Engineer

SWIGGY

Jan. 2019 – Jul. 2021

DATA SCIENCE PLATFORM, TIME SERIES FORECASTING

- Worked on Feature Store and pipeline which feed on-demand features to deployed ML models at production scale.
- Started Forecasting and Correlation Platform which is used by teams to forecast concerned time series.
- Led DAQ, which is a tool used to scrape APIs at scale. Used to collect data for analysis/ model training.

Software Development Engineer(ML)

FLIPKART

Sep. 2017 – Jan. 2019

SEARCH RELEVANCE, QUERY INTENT, NLP

- Was involved in improvements/inception of search intent models(CRF/Neural Network based), identifying error classes, coming up with solutions, and fixing them.
- Worked on Fast text based query store classifier, which predicts the category of a query.
- Wrote the first workflow to automate training and auto-deployment of various search models. First was written using Luigi and later migrated to Airflow.
- Wrote a generic framework using Airflow which at runtime creates generic dags for different ML models and orchestrates their training to deployment flow, including data and model validations.
- Used Cascading/HDFS to extract data from user events and then transform it to be used for training our models.

Software Development Engineer

GROUPON

Sep. 2016 – Sep. 2017

BACKEND ENGINEERING

- Worked on a component called Cyclops, an interface between Customer representatives and internal services

Software Engineer

NETSPEED SYSTEMS

Sep. 2015 – Aug. 2016

GRAPH ALGORITHMS, NETWORK ON CHIP

- Worked on many modules like Polarity based Arbitration, Multi-Cast Filtering, Structural Latency Breakdown etc.
