Work Experience

Senior Software Dev Engineer

Jan. 2019 - Jul. 2021

SWIGGY

DATA SCIENCE PLATFORM, TIME SERIES FORECASTING

- · Was part of team that worked on Feature Store and pipeline which feeds on-demand features to deployed ML models at production scale(4Bn rows, 1Mn QPS / day). Pipeline supported multichannel ingestion, i.e. Spark, Flink and user files etc.
- · Founding member of Forecasting and Correlation Platform which was considered by many teams to forecast concerned time series. These forecasts power critical scaling decisions across organizations in real time.
- Led DAQ, a tool used to scrape APIs at scale. Used to collect data for analysis/ model training at a scale of 15 M rows daily.

• Software Development Engineer(ML)

Sep. 2017 – Jan. 2019

FLIPKART (a Walmart company)

SEARCH RELEVANCE, QUERY INTENT, NLP

- Was responsible for improvements/inception of search intent models(CRF/Neural Network based), identifying error classes, coming up with solutions, and fixing them. These models power user search and discovery for millions every day.
- Implemented a FastText based query store classifier, which predicts the category of a tail query.
- Implemented the first workflow to automate training and auto-deployment of various search models in Flipkart. First was written using Luigi and later migrated to Airflow.
- Wrote a generic framework using Airflow which at runtime creates generic dags for different ML models and orchestrates their training to deployment flow, including data and model validations.
- Implemented large scale (4Bn+ datapoints) pipelines using Cascading/HDFS to extract data from user events and then transform it to be used for training these models.

• Software Development Engineer

Sep. 2016 - Sep. 2017

BACKEND ENGINEERING GROUPON• Worked on a component called Cyclops, an interface between Customer representatives and internal services

Software Engineer

Sep. 2015 – Aug. 2016

NETSPEED SYSTEMS (Acquired by Intel)

GRAPH ALGORITHMS, NETWORK ON CHIP

• Led engineering efforts on modules like Polarity based Arbitration, Multi-Cast Filtering, Structural Latency Breakdown etc.
